

D1
Cont'd

2. (Twice Amended) A method of tightening the skin comprising applying onto skin a composition comprising a skin-tightening effective amount of at least one grafted silicone polymer comprising a polysiloxane portion and a portion comprising a non-silicone organic chain, one of the two portions constituting a main chain of the polymer and the other being grafted to the main chain, wherein the grafted silicone polymer is a polymer with a polysiloxane backbone grafted by at least one non-silicone organic monomer.

Sub E1

3. (Twice Amended) A method for removing wrinkles comprising applying onto skin a composition comprising a wrinkle-removing effective amount of at least one grafted silicone polymer comprising a polysiloxane portion and a portion comprising a non-silicone organic chain, one of the two portions constituting a main chain of the polymer and the other being grafted to the main chain, wherein the grafted silicone polymer is a polymer with a polysiloxane backbone grafted by at least one non-silicone organic monomer.

D2

20. (Amended) A composition comprising, in a physiologically acceptable medium, a skin-tightening effective amount of at least one grafted silicone polymer comprising a polysiloxane portion and a portion comprising a non-silicone organic chain, one of the two portions constituting the main chain of the polymer and the other being grafted to the said main chain and one or more plant proteins.

Sub E2

21. (Twice Amended) A composition comprising, in a physiologically acceptable medium, a skin-tightening effective amount of at least one grafted silicone polymer comprising a polysiloxane portion and a portion comprising a non-silicone organic chain, one of the two portions constituting the main chain of the polymer and the other being grafted to the said main chain and one or more slimming, firming, antiglycant and/or vasoprotective compounds.

Please add the following new claims.

D³ --27. (New) The method according to Claim 1, further comprising allowing said composition to remain on the skin after said applying, thereby forming a film

28. (New) The method according to Claim 1, further comprising allowing said composition to remain on the skin after said applying, thereby forming a film

29. (New) The method according to Claim 1, further comprising allowing said composition to remain on the skin after said applying, thereby forming a film.

30. (New) The composition according to Claim 21, wherein the slimming, firming antiglycant and/or vasoprotective compound is selected from the group consisting of phosphodiesterase inhibitors, 1-hydroxyalkylxanthines, caffeine citrate, theophylline, derivatives of theophylline, theobromine, acefylline, aminophylline, chloroethyltheophylline, diprophylline, diniprophylline, etamiphylline, derivatives of etamiphylline, etofylline or proxiphylline; combinations comprising xanthine derivatives, the combination of caffeine and silanol-(methylsilanetriol(derivative of caffeine)); compounds of natural origin comprising xanthine bases; tea, coffee, guarana, maté or cola (*Cola nitida*) extracts, the dry extract of guarana (*Paulina sorbilis*) fruit comprising 8 to 10% of caffeine; ephedrine, derivatives of ephedrine; plant extracts of *Garcinia cambogia*, *Bupleurum chinensis* extracts, extracts of English ivy (*Hedera helix*), extracts of mountain tobacco (*Arnica montana* L), extracts of rosemary (*Rosmarinus officinalis*), extracts of marigold (*Calendula officinalis*), extracts of sage (*Salvia officinalis* L), extracts of ginseng (*Panax ginseng*), extracts of St John's Wort (*Hypericum perforatum*), extracts of butcher's broom (*Ruscus aculeatus* L), extracts of meadowsweet (*Filipendula ulmaria* L), extracts of cat's whiskers (*Orthosiphon stamineus* Benth) or of birch (*Betula alba*), *Ginkgo biloba* extracts, horsetail extracts, horse chestnut
